

CENTRE FOR CONTEMPORARY ART AND THE NATURAL WORLD

Art-Science hothouse residency: Tasting the change

Saturday November 9 to Friday November 15 2019, Dartington Hall, UK (TQ9 6EL)

In November 2019 CCANW and Science Walden will co-host an Art-Science hothouse residency, a week of experimentation and conversation about working across disciplines for a very small number of participants. The focus is on how we can respond intelligently to the challenges of the climate emergency through creative projects or practice. We are interpreting 'Art-Science' very loosely: 'scientists' in this context means anyone with a knowledge who is not an artist (and therefore may include philosophers, historians, mathematicians, etc.): we explore how knowledges are shared, exploited and enhanced through collaboration.

The hothouse runs to the end of the day on Thursday November 14 and is immediately followed by a public one-day symposium ('Emergency Response Time') with the hothouse teams and other invited presenters.

We are looking for established teams who wish to spend some concentrated time together. We will however also consider proposals from teams or couples who have not worked together given a strong enough rationale for the grouping.

The residency begins late afternoon on Saturday November 9, and finishes around 4pm on Thursday November 14; the public symposium event takes place on Friday 15th and you are asked to make a presentation as part of your residency award.

Each team will receive an honorarium of £800 plus room and board and a travel allowance.

As part of the residency you will be asked to keep audio diaries and will also be 'interviewed' in conversation. This will form the basis of a publication afterwards.

We ask that the application be led by the artist in the team but we will need to see evidence of a strong collaborative ethos and an emergent practice. **The deadline for applications is midnight on Thursday, September 12.** Find more information and application form at artdotearth.org/hothouse-coolhouse

Art-Science coolhouse: Emergency Response Time

Friday November 15 09.30 to 16.30, Dartington Hall, UK (TQ9 6EL)

This document is preliminary. More information to follow.

Tasting the Change and Emergency Response Time are produced for CCANW/Science Walden by [art.eearth](http://art.eearth.org) (artdotearth.org).

Residency offer

The residency begins late afternoon on Saturday November 9, and finishes around 4pm on Thursday November 14; the public symposium event takes place on Friday 15th and you are asked to make a presentation as part of your residency award.

There is little structure to the days as this is primarily a time for you to work with your team members to experiment and dream. We will find you a workspace suited to your practice and we will come together twice a day for sharing, and at mealtimes.

We will provide accommodation, room and board and support your travel. Each team will also receive an honorarium of £800. Please note that accommodation is basic, hostel-style accommodation with single rooms and shared bathrooms. You may choose to upgrade to hotel accommodation but this will be at your own expense.

The Innovation Centre, Rennes Drive, University of Exeter, EX4 4RN
